

Measles Case Reported In Burleigh County

Measles
IT ISN'T JUST A LITTLE RASH

Measles can be dangerous, especially for babies and young children.

MEASLES SYMPTOMS TYPICALLY INCLUDE

- High fever (may spike to more than 104° F)
- Cough
- Runny nose
- Red, watery eyes
- Rash breaks out 3-5 days after symptoms begin

Measles Can Be Serious

- About 1 out of 4 people who get measles will be hospitalized.
- 1 out of every 1,000 people with measles will develop brain swelling due to infection (encephalitis), which may lead to brain damage.
- 1 or 2 out of 1,000 people with measles will die, even with the best care.

You have the power to protect your child.

Provide your children with **safe** and **long-lasting protection** against measles by making sure they get the **measles-mumps-rubella (MMR) vaccine** according to CDC's recommended immunization schedule.
