The Data Is In, But How Does It Come Out?

During this WebEx, National Healthcare Safety Network-Clostridium Difficile Initiative project participants will learn how to extract reports from the submitted data. Peg Gilbert will share steps to ensure data quality, how to generate datasets and interpret CDI data to prioritize improvement efforts.

Target Audience:

National Healthcare Safety Network-Clostridium Difficile Initiative project participants, long-term care infection preventionists, quality improvement, administrators, DON/ADONs are invited to join this event

Objectives:

Upon completion of the WebEx, participants will be able to:

1. Describe the steps to ensure data quality
2. Recognize steps to generate datasets in NHSN
3. Interpret CDI data to prioritize improvement efforts

Presenter:

Peg Gilbert, RN, MS, CIC, FAPIC
Quality IC, LLC

Peg's focus is to improve infection prevention practices in healthcare facilities using proven quality improvement strategies. Peg has a Master's Degree in Nursing from Creighton University (1993), is Certified in Infection Control and was in the first group named as an APIC Fellow. Currently, Peg is managing a grant from the CDC awarded to the Nebraska Department of Health and Human Services on improving injection safety practices, is a consultant for the Great Plains QIN-QIO and an independent contractor for APIC Consulting. Peg has spent the last several years assisting facilities with accurate reporting to the National Healthcare Safety Network database. Peg recently received the 2017 Distinguished Service award from the Nebraska Infection Control Network (NICN) and is on the board of directors for the Greater Omaha APIC Chapter, NICN, and the State HAI Advisory Council.
