

## Adult Residential Care

North Dakota has 15 adult residential care facilities, two of these facilities specializing in head injury services. The remaining 13 facilities specialize in the care of those with Alzheimer's. Residents who are admitted screen in need of skilled nursing care, but are cared for in this more independent setting that is licensed as basic care. This approach is cost effective and highly regarded by family and residents.

The rate for this service is established at the time the provider agreement is signed with annual cost of living adjustments.

Besides the daily rates below, a room and board rate is charged. The current maximum monthly room and board rate is \$766.00 per month. In comparison the rate for home based personal care at 15 minute increments is \$7.31 for agency and \$5.32 for individual QSPs.
