

Quality Measure Deep Dive

Navigate the Quality Measures (QMs) that define SNF performance with practical strategies to improve outcomes, strengthen compliance, and protect reimbursement. Participants will develop a clear understanding of how key measures are defined, coded, and calculated—and how day-to-day clinical practice translates into overall facility performance. Each session includes practical strategies, real-world examples, and focused documentation guidance designed to strengthen data accuracy, support compliance, and drive meaningful improvements in resident care.

Target Audience

Directors of Nursing, Clinical Reimbursement Specialists, Administrators, Restorative and IDT members, Quality Assurance staff, MDS/RAI nurses

CEUs

One (1) contact hour each session;
NAB approved through Proactive LTC Consulting.

Cost:

Member Full Series - \$420

Non-Member Full Series - \$840

Presented By:

Sarah Becker, RN, RAC-CT, DNS-CT, QCP
Director of Clinical Reimbursement

**Eleisha Wilkes, RN, GERO-BC,
RAC-CT, RAC-CTA, DNS-CT, QCP**
Senior Consultant

**Christine Twombly, RN-BC,
RAC-MT, RAC-MTA, HCRM, CHCS**
Senior Consultant

Webinars will begin at:

1:30 pm Every Wednesday for 8 Weeks

Quality Measure Deep Dive

April 15 - Anchoring ADLs/Functional Status Measures for 5-Star Success

Examine how functional decline and improvement measures are calculated, common MDS coding pitfalls, and the role of interdisciplinary documentation in supporting accurate reporting.

April 22 - Turning the Tide on Falls & Falls with Major Injury

Dive into the falls and falls with major injury QMs by gaining clarity on CMS injury definitions, MDS coding requirements, and documentation standards that directly impact QM performance and public reporting. Consider best practices to drive improvement in this highly scrutinized QM focus area.

April 29 - Below the Surface: Exploring the Pressure Ulcer QM

Explore the short and long-stay pressure ulcer/injury QMs, how pressure ulcer development impacts quality outcomes, Five-Star ratings, survey risk, and more!

May 6 - Navigating Psychotropics, Depressive Symptoms, and Behaviors

This session explores the QMs focused on psychotropic medications, including antipsychotics, anxiolytics, and hypnotics, as well as residents who have depressive symptoms or have behavior symptoms affecting others.

May 13 - Ship Shape QMs & Other Considerations

Improve your depth of knowledge of the remaining QMs including vaccination rates, urinary tract infections, indwelling catheter use, physical restraints, unintended weight loss, and incontinence. Gain valuable insights into systems to drive performance and understand the implications of non-compliance.

May 20 - Smooth Sailing with VBP

This session focuses on the SNF VBP program, including current measures, scoring methodology, financial incentives, and the impact on Medicare reimbursement. Participants will learn how CMS evaluates performance, and strategies to improve their VBP results.

May 27 - Diving in to QRP

Master the SNF QRP requirements, including current quality measures, MDS data elements, and submission expectations. The SNF QRP Validation Program will be discussed with a focus on how the review process works, what documentation is required, and how to prepare for a successful audit.
